Projects

Roavista (Accommodation Marketplace)

2024

Stack: Node.js, Express.js, MongoDB, Mongoose, Passport.js, Cloudinary, Mapbox, EJS

- Built a full-stack rental marketplace for listing, discovering, and booking global accommodations (inspired from Airbnb) with interactive map-based property browsing via Mapbox.
- Managed API keys and configurations using Google Cloud Console for secure and efficient integration of external services.
- Developed a secure image gallery system allowing users to upload multiple property photos using Multer and Cloudinary.

Tashion AI - Multi-Model AI Comparison Platform

2025 - Present

Stack: React.js, Node.js, Express.js, OpenAI API, Google Gemini API, REST APIs

- Developing an AI aggregator for real-time side-by-side comparison of GPT and Gemini outputs within a single unified React.js interface.
- Implemented optimized state management for concurrent API calls with secure key handling and rate-limit resilience across multiple LLM providers.

ChatGPT & Gemini Clone - Unified AI Chat Interface

2025

Stack: React.js, Node.js, Express.js, OpenAI API, Google Gemini API

- Built a responsive full-stack chat app with persistent history and real-time AI response streaming using both OpenAI and Google Gemini APIs.
- Designed a multi-model toggle interface in React.js for seamless switching between LLM providers without interrupting the active chat session.
